

## <figcaption> - FIGURE CAPTION TAG IN HTML

- The **<figcaption> tag** is used to add a caption for a **<figure>** element.
- The first or last child of the **<figure>** element is placed as the **<figcaption> element**.
- The **<map>** tag belongs to **flow content, phrasing content and palpable content**.
- The **<map>** tag supports **Global Attributes and Event Attributes**.

### Syntax for <figcaption> tag:

```
<figure> <figcaption> content </figcaption> </figure>
```

### Different between HTML 4.0.1 and HTML 5

#### HTML 4.0.1

- HTML4 does not supports <figcaption> tag.

#### HTML 5

- The <figcaption> tag is new in HTML5.

## Sample coding for <figcaption> tag:

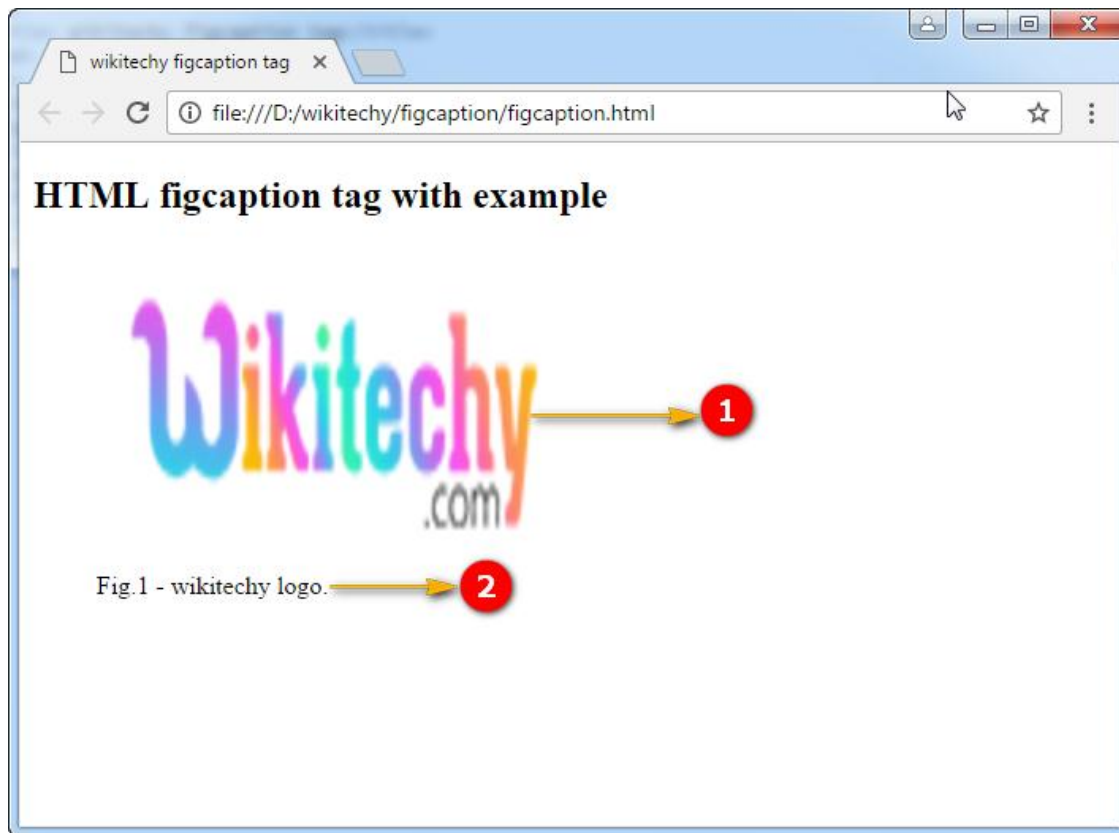

```
<!DOCTYPE html>
<html>
  <head>
    <title> wikitechy figcaption tag </title>
  </head>
  <body>
    <h2>HTML figcaption tag with example</h2>
    <figure>
      
      <figcaption>Fig.1 - wikitechy logo.
    </figcaption>
    </figure>
  </body>
</html>
```

## Code Explanation for <figcaption> tag:

```
<!DOCTYPE html>
<html>
  <head>
    <title> wikitechy figcaption tag</title>
  </head>
  <body>
    <h2>HTML figcaption tag with example</h2>
    <figure> ← 1
      
      <figcaption>Fig.1 - wikitechy logo. ← 2
    </figcaption>
    </figure>
  </body>
</html>
```

1. **<figure> tag** is used to hold `<img>` and `<figcaption>` which is self-contained content.
2. The **<figcaption> tag** is used to set the figure name as "Fig.1 - wikitechy logo."

### Sample Output of `<figcaption>` tag:

1. The output shows the wikitechy logo by using `<figure>` tag.
2. The output shows the "Fig.1-wikitechy logo as a figure caption by using `<figcaption>` element.
